

# Chronic Obstructive Pulmonary Disease Patient Care Flow Sheet

Ministry of  
Health

This flow sheet is based on the guideline: *Chronic Obstructive Pulmonary Disease (COPD)* available at [www.BCGuidelines.ca](http://www.BCGuidelines.ca)

NAME OF PATIENT	BIRTHDATE
CO-MORBID CONDITIONS	PHN
	DATE OF DIAGNOSIS

## Spirometry

Date \_\_\_\_\_  
 Patient's FEV<sub>1</sub> as a percent of their predicted value \_\_\_\_\_ FEV<sub>1</sub>/FVC ratio \_\_\_\_\_

Confirmation of a post-bronchodilator FEV<sub>1</sub>/FVC ratio of < 0.7 for a COPD diagnosis

## COPD Classification

By Spirometry     mild     moderate     severe     very severe

## Assessment

Height									
Weight									
Smoker S    Non-smoker N									
Quit date									
<b>Smoker:</b> Provide brief intervention									
Give Quit Line # 1-877-455-2233									
Referral to stop smoking program									
Influenza vaccine									
Pneumococcal vaccine									
Short-acting beta <sub>2</sub> agonist									
Anticholinergic (Long-acting if > mild COPD)									
Long-acting beta <sub>2</sub> agonist									
Combination LABA/ICS (For FEV <sub>1</sub> % predicted < 50% plus >1 exacerbation in past 12 months or significant reversibility in FEV <sub>1</sub> after bronchodilator)									
Theophylline									
Severe COPD: supplemental oxygen									
Obstructive sleep apnea screening?									
Date of last exacerbation									
Exacerbation action plan									
Antibiotic Rx									
Prednisone Rx									
Review medications and side effects									
Refer to Pulmonary rehab									
Provide disease specific education									
Discuss & evaluate inhaler use & provide handouts									
Specialist referral
